

To The FCC -

It is just ludicrous to say that TV and Radio calls are not advertisements when they are trying to get us to watch in order to buy the products that their advertisers are selling. It is simply a matter of pandering to these power brokers on the part of the government that they should be exempt from the "Do Not Call List".

If you are going to protect the public from these annoying, unwanted and disrupting calls all companies including utilities should be included.

Thank you for listening to my comments.

Rita Arrigo
